

PL6 DL

210 Product code

Polyurethane thinner

Technical characteristics

Appearance	Limpid	Storage stability	24
Colour	Transparent	Package	10 kg
Density	0.855 ± 0.05 kg/L		

Description

PL6 DL is a polyurethane thinner, formulated from highly selected raw materials. It is used for diluting polyurethane waterproofers, such as those in Tradimalt's Tradielastic line.

Thanks to its high solvent power, it is recommended for cleaning dirty brushes and tools after application.

Warnings and recommendations

Store in original sealed containers at a temperature not exceeding +40 °C. Keep away from flames, sparks or heat

sources. Preferably use within three years of the production date (shelf life).
